

## From indicators to an integrated assessment of the sustainability and resilience of the Swiss energy system

Eleftherios Siskos, Peter Burgherr

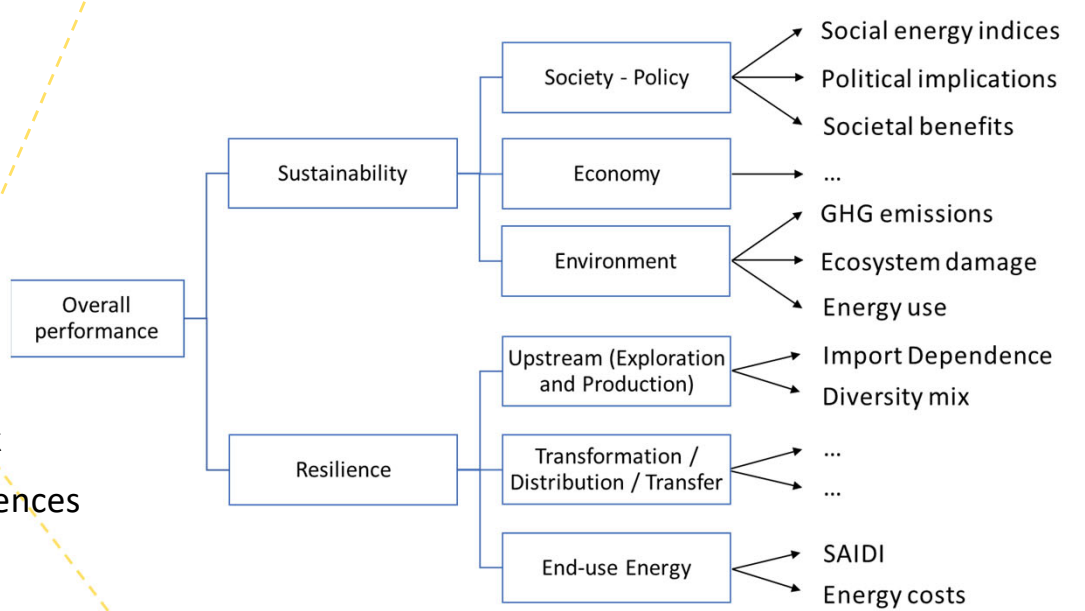

Technology Assessment Group, Laboratory for Energy Systems Analysis, Paul Scherrer Institut (PSI)

### 1. Utility of the SURE database

- Selection and refinement of a holistic set of indicators
- Categorization of the indicators and coupling with metadata
- Specification of modelling requirements
- Development of a database exploitation plan

### 2. Sketching a Multi-Criteria Decision Analysis system

### 3. Development of an MCDA preference model

- Proposition of a transparent methodological framework
- Protocols to efficiently capture the stakeholders' preferences
- Actual testing of the method and delivery of feedback
- Specification of robustness analysis and control tools

### 4. Overview of the Technical Plan and Flowchart
